PRELIMINARY AMENDMENT

Dear Sir:

Please amend the above-identified, enclosed patent application as follows:

IN THE CLAIMS

Please amend the claims 4, 5, 6 and 9 as rewritten below:

4. Method according to Claim 2, characterized in that control information input which cannot be reliably interpreted is correspondingly marked in the return signalling.

5. Method according to claim 1, characterized in that a check is made whether the control information is complete in order to be able to execute a requested action, and that the user is requested to complete the control information if this is not the case.

6. Method according to claim 1, characterized in that the control information input as keyword or keywords is compared with stored keywords for the purpose of interpretation.
